Floor Heating Catalog 2023

Electric Floor Heating Systems

nvent

NUHEAT

About this catalog

This document is for tile and electrical contractors who install or are interested in installing nVent NUHEAT Electric Floor Heating Systems.

This catalog is an excellent resource for installation techniques and for learning how to convey the benefits of electric floor heating to homeowners. It also provides guidance on how to choose the best floor heating system for a particular project and explains how you can grow your business as a contractor installing nVent NUHEAT Floor Heating Systems.

Exceed your customers' expectations – Add warmth to any floor

As a flooring or electrical contractor, if you are on site installing a new floor or completing electrical work, now is the ideal time to add floor heating to your customer's home.

Exceed your customers' expectations! Add warmth to their new floor. They will love the added comfort that nVent NUHEAT brings to their home.

WHY NVENT NUHEAT FOR HOMEOWNERS?

Comfort is everything, especially in your home. With nVent NUHEAT Electric Floor Heating Systems, you can offer the comfort of a warm floor that is maintenance-free for your customers. nVent NUHEAT Electric Floor Heating Systems are ideal for both new construction or renovation projects and come with a long list of benefits for homeowners...

1. Improved Comfort & Safety

- Even heat distribution throughout the living space, not concentrated near vents, radiators or the ceiling
- Improves indoor air quality by...
 - Facilitating the choice of low VOC surfaces (tile, slate, terrazzo, concrete) that otherwise may be perceived as cold
 - Establishing surface temperatures that prevent growth of mold, bacteria, viruses, and dust mites
 - Not circulating allergens or drying the air like forced air systems
- Is silent, invisible, and takes up no living space unlike baseboards and wall-mounted radiators
 - Furniture can be placed directly against walls
 - Eliminates unsightly heating equipment with risk of trip and fall injuries

2. Peace of Mind

- Maintenance-free and backed by the industry's best warranties, especially when installed by a nVent NUHEAT Certified PRO
- Certified PRO installers can offer the 25-Year Total Care Warranty which covers the entire installation including floor coverings, labor, and repairs
- nVent NUHEAT warranties are not pro-rated, protecting the owner's coverage value over time
- nVent NUHEAT has been manufacturing premium quality Electric Floor Heating Systems since 1989

3. Energy Efficiency

- Offers enhanced comfort at lower ambient temperature
- Doesn't waste energy heating unoccupied space (ceilings & vents)
- The quick warm-up time of nVent NUHEAT Systems enables "zone heating" – heating only the areas in use
- The nVent NUHEAT Signature WiFi thermostat allows you to control and monitor energy use from anywhere

4. Affordability

- nVent NUHEAT Floor Heating Systems add luxury and value to any home for a fraction of other renovation or building costs

Why nVent NUHEAT for Contractors?

Time is money! nVent NUHEAT has focused on supporting professional installers since the beginning and our systems offer several benefits for flooring and electrical contractors...

1. Profitability

- nVent NUHEAT Electric Floor Heating Systems are typically a small portion of building and renovation cost but they provide lasting, tangible benefit (high perceived value) for clients
- nVent NUHEAT offers premium quality and world-class support, meaning you spend more time installing and less time trouble-shooting

2. Expertise

- Our team of experts is here to help – before, during, and after the installation; over the phone; and even on the job site
- The nVent NUHEAT Customer Care Team is available 5 days a week via phone, email, and instant online chat, giving you the support you need in the field

3. Easy Installation

- nVent NUHEAT Systems install quickly and reduce site prep time, adding little additional labor to typical jobs such as bathroom or kitchen renovations
- Mats install quicker than any other system available and require little-to-no site prep, reducing time on-site
- The nVent NUHEAT product line encompasses all major types of electric floor heating systems, allowing contractors to choose the right system for the job and never having to worry about lesser quality on our less expensive solutions
- nVent NUHEAT Floor Heating Systems work with the widest variety of complimentary products and don't require use of certain products to receive complete warranty coverage
- nVent NUHEAT warranties do not require excessive testing or the use of specific mortars or other products for installation, allowing the contractor to decide what's best for the job

4. Quality

- nVent NUHEAT has set the industry benchmark for quality & features since 1989, giving contractors a product line they can be proud to install and recommend

5. nVent NUHEAT Certified PRO Program

- Certified PRO installers (CPROs) have exclusive rights to offer the 25-Year Total Care Warranty, covering the complete installation, including floor coverings, labor, and repairs
- CPROs get listed on nuheat.com under "Find An Installer", benefitting the heavy web traffic on Nuheat.com
- CPROs gain access to exclusive offers and loyalty benefits

¹ All nVent NUHEAT products are backed by a 25-Year Product Warranty. An additional Total Care Warranty can also be applied if a product is installed by a nVent NUHEAT Certified PRO installer. See page 18 for details.

Standard Mats

THE THINNEST PRE-BUILT ELECTRIC FLOOR HEATING MAT

FAST FACTS

- 150 ft² can be installed on a single 120 V circuit
- 300 ft² can be installed on a single 240 V circuit

Material	Consist of a single-conductor tinned copper braided heating wire sandwiched in a pre-configured pattern between durable, two porous layers of fabric
Operating Voltage	120 V, 208 V, and 240 V
Power Output	12 W/ft ² (standard mats are only 12 W/ft ²)
Maximum Continuous Exposure Temperature	194°F (90°C)
Heating Cable	Single wire with ground braid outer layer
Cold Lead	2-wire, 18 AWG plus ground braid layer; 10 ft (3 m) length

BENEFITS

Easy to install. Standard Mats are pre-built and ready to install right out of the box. The Standard Mat is simply adhered to the subfloor using thinset and flooring can be immediately installed on top.

Error-free. Standard Mats eliminate the need to calculate and experiment with wire spacing during the installation. Consistent wire spacing and heat coverage is guaranteed.

Reduces installation time. Standard Mats shorten the installation process compared to cable and mesh systems because it eliminates the need to manipulate the heating product on site.

Does not raise floor height. Standard Mats guarantee minimal floor height increase. At 1/8 in thick, the ultra low profile of this product reduces the build up on the floor which makes transitions possible without the use of transition strips.

Comprehensive selection of sizes to choose from. Standard Mats are available in over 60 standard sizes in both 120 V & 240 V which provide optimal floor heating coverage in most standard areas.

Available immediately. Find a local distributor near you at <http://www.nuheat.com/where-to-buy>

HOW TO INSTALL

Step 1: Spread modified thinset onto subfloor using minimum 1/4 in x 1/4 in square notched trowel.

Step 2: Place Standard Mat onto fresh thinset, press firmly to create 100% contact between Standard Mat, thinset and subfloor.

Step 3: Secure floor sensor probe between heating wires.

Step 4: Apply a thin layer of thinset and install tile/stone flooring as per manufacturer's instructions.

Custom Mats

THE THINNEST CUSTOM-BUILT ELECTRIC FLOOR HEATING MAT

FAST FACTS

- 150 ft² can be installed on a single 120 V circuit (120 ft² at 15 watts)
- 300 ft² can be installed on a single 240 V circuit (240 ft² at 15 watts)
- After dimensions are confirmed, custom mats are manufactured in only 3 days.

Material	Consist of a single-conductor tinned copper braided heating wire sandwiched in a pre-configured pattern between durable, two porous layers of fabric
Operating Voltage	120 V, 208 V, and 240 V
Power Output	12 W/ ft ² (15 W/ft ² when required/specified)
Maximum Continuous Exposure Temperature	194°F (90°C)
Heating Cable	Single wire with ground braid outer layer
Cold Lead	2-wire, 18 AWG plus ground braid layer; 10 ft (3 m) length

BENEFITS

Perfect fit for any room. The Custom Mat is custom manufactured based on your floor dimensions to provide 100% heating coverage. Once dimensions are confirmed, a custom mat is manufactured to fit the exact dimensions of your floor area.

Perfect heat distribution. Custom Mats eliminate the need to calculate and experiment with wire spacing during the installation. Consistent wire spacing and heat coverage is guaranteed.

Easy to install. Custom Mats are ready to install right out of the box. The Custom Mat is simply adhered to the subfloor using thinset and flooring can be immediately installed on top.

Reduces installation time. Custom Mats shortens the installation process compared to cable and mesh systems because it eliminates the need to manipulate the heating product on site.

Does not raise floor height. Custom Mats guarantee minimal floor height increase. At 1/8 in thick, the ultra low profile of this product reduces the build up on the floor which makes transitions possible without the use of transition strips.

Higher heat output options. Custom Mats can be manufactured to produce the standard 12 W/ft² (41 BTUs/ft²) or 15 W/ft² (51 BTUs/ft²) for areas where more heat is needed at no additional cost.

Short delivery time. Custom Mats can be manufactured in just three days and ships out to the customer four days after dimensions are confirmed.

Error-free. Custom Mats eliminate the need to calculate and experiment with wire spacing during the installation. Consistent wire spacing and heat coverage is guaranteed.

Custom Mats

THE THINNEST CUSTOM-BUILT ELECTRIC FLOOR HEATING MAT

HOW TO MEASURE YOUR ROOM FOR A CUSTOM MAT

Pick a corner of the room and use that as the starting point for your measurements. Remember that you must return to this starting point at the end of your measurements.

1. Measure and draw the walls of the room on paper and record the measurements.
2. Measure and draw the location of cabinets and vanities, make sure to take the measurement right up to the toe-kick.
3. Measure and draw the location of floor features such as vents and toilet drains (measure from the walls to the center of the toilet drain).
4. Indicate the thermostat location and voltage if known.

An online measuring tutorial is available at: <http://www.nuheat.com/customer-care/how-to-measure>

HOW TO ORDER

1. Obtain an accurately measured floor plan including all perimeter dimensions and any vents or obstacles in the floor. Note the thermostat location. See Mat Measuring for steps to do this correctly.
2. Email your design and all customer and job information to res.customercare@nvent.com
3. Upon design confirmation, you will receive a quote for your project (quote turnaround time is ~24 hours).
4. Have customer confirm all dimensions and have customer sign off on their design. Submit purchase order.
5. Mat will arrive 6-7 business days from the time order is placed.

HOW TO INSTALL

Step 1: Spread modified thinset onto subfloor using minimum 1/4 in x 1/4 in square notched trowel.

Step 2: Place Custom Mat onto fresh thinset, press firmly to create 100% contact between Custom Mat, thinset and subfloor.

Step 3: Secure floor sensor probe between heating wires.

Step 4: Apply a thin layer of thinset and install tile/stone flooring as per manufacturer's instructions.

Cable

THE ROBUST FLOOR HEATING CABLE SOLUTION

FAST FACTS

- Compatible with Nuheat Membrane and other integrated heated uncoupling membrane products
- Zero EMF heating cable design

Material	Two single conductor Tefzel-coated resistance wires covered by a tin-plated copper braid and then coated with a durable copolymer (PVC) outer jacket
Operating Voltage	120 V and 240 V
Power Output	12 - 15 W/ft ² depending on wire spacing
Maximum Ambient Temperature	194°F (90°C)
Heating Cable	2-wire, grounded, twisted air with PVC outer jacket
Cold Lead	2-wire, 16-18 AWG plus ground braid layer; PVC outer jacket, 10 ft (3 m) length

Cable spacing examples

3 inch spacing (12 W/ft²)

3/2/3 inch spacing (15 W/ft²)

BENEFITS:

- On-site flexibility.** Cable can easily be adjusted on-site to provide heat coverage where it is desired, on-site adjustment flexibility is ideal for flooring that is complex and has curves and angles.
- Flexible wire spacing and heat output.** Cable provides the installer the ability to adjust the wire spacing and heat output according to the installation needs. Installers only need to know the approximate square footage of the area(s) that need to be heated.
- Compatible with Membrane.** Cable is compatible with Membrane; the integrated floor heating and uncoupling product from nVent NUHEAT. When combined these products reduce stress caused by floor movement between a tile layer and subfloor layer.
- Comprehensive selection of sizes to choose from.** Cable is available in 33 sizes in both 120 & 240 V which allows installers to choose the perfect sized kit for the area they wish to heat.
- Available immediately.** Find a local distributor near you at <http://www.nuheat.com/where-to-buy>.

Cable

THE ROBUST FLOOR HEATING CABLE SOLUTION

HOW TO INSTALL:

- Step 1:** Plan the heating cable installation before securing any part of the floor heating system to the subfloor.
- Step 2:** Install the heating cable according to the Installation Layout Plan.
- Step 3:** Install stabilizing cable guides to ensure the heating cable does not float during the self-leveling process.
- Step 4:** Secure the floor sensing probe. Route the thermostat probe up to the thermostat electrical box.
- Step 5:** Prepare the subfloor using self-levelling compound/thinset mortar as per manufacturer's instructions.
- Step 6:** Install tile/stone flooring.

Recommended

For installations where higher heat output is required, alternating 3 in/2 in spacing (15 W/ft²) may be used. * 3 in Spacing - 12 W/ft² ** Alternating 3 in/2 in spacing - 15 W/ft²

†Pillars of the uncoupling membrane ‡Our recommended spacing is alternating 2-3-2 pillar spacing which produces 12 W/ft². If you are installing over a concrete slab and require more heat, we recommend using 2-pillar spacing which produces 15 W/ft².

Membrane

THE INTEGRATED ELECTRIC FLOOR HEATING AND UNCOUPLING SOLUTION

FAST FACTS

- Thin profile heating cable and electrical lead
- Durable heating cable construction
- Flexible heat output (10, 12, 15 W/ft²)
- Largest 120 V kit covers 120 ft² and largest 240 V kit covers 240 ft², producing 41 BTUs/ft²

Material	Membrane is a polypropylene sheet that is thermo-bonded to a non-woven polypropylene fabric on the underside. It is 0.22 inches thick, 39 inches wide and weighs 840 grams/m ²
Operating Voltage	120 V, 208 V, and 240 V
Power Output	10 - 15 W/ft ² depending on wire spacing. Our recommended spacing is alternating 2-3-2 pillar spacing which produces 12 W/ft ² . If you are installing over a concrete slab and require more heat, we recommend using 2-pillar spacing which produces 15 W/ft ² .
Maximum Ambient Temperature	194°F (90°C)
Heating Cable	2-wire, grounded, twisted air with PVC outer jacket
Cold Lead	2-wire, 16-18 AWG plus ground braid layer; PVC outer jacket, 10 ft (3 m) length

Membrane spacing examples

2/3/2 Pillar spacing (12 W/ft²)

2 Pillar spacing (15 W/ft²)

BENEFITS:

Reduces risk of tile cracks due to subfloor movement. Membrane is an uncoupling membrane which absorbs subfloor movements that can cause tiles to crack. Membrane received the highest 'Extra Heavy' result in Robinson Floor Test (ASTM C627).

Acts as tile underlayment. Membrane can replace plywood/concrete board as the tile underlayment in most tile installations.

Compatible with the Cable floor heating system. Membrane is specifically designed to accept the best-in-class Cable floor heating system. This combined system simplifies the installers' lives, as there is no need for metal or plastic guides and self leveler.

Flexible wire spacing and heat output. When combined with Cable as the floor heating solution, the integrated system provides the installer the ability to adjust the wire spacing and heat output according to the installation needs.

Compatible with modified thinsets for tile setting. Tile/stone floors can be installed on Membrane using modified and unmodified thinsets.

On-site flexibility. Membrane is cut on-site to fit the room. Cable is then installed into Membrane and adjusted on-site to provide heat coverage where it is desired.

Membrane

THE INTEGRATED ELECTRIC FLOOR HEATING AND UNCOUPLING SOLUTION

BENEFITS *CONTINUED*:

Waterproof. Membrane is made from extruded polypropylene and can be used as a waterproofing membrane.

Available immediately. Find a local distributor near you at <http://www.nuheat.com/where-to-buy>

HOW TO INSTALL:

Step 1: Spread thinset mortar to the substrate using a trowel.

Step 2: Roll Membrane onto the thinset mortar and press with a roller or a flat trowel.

Step 3: Snap the Cable into the Membrane.

Step 4: Using flat trowel, cover the membrane with thinset to ensure heating cable is encapsulated with thinset.

Step 5: Install tile/stone flooring.

Mesh

THE SELF-ADHESIVE ELECTRIC FLOOR HEATING SOLUTION

FAST FACTS & ELECTRICAL DETAILS:

- Zero EMF cable design
- 13 120 V kits, ranging in size from 12 ft² to 120 ft²
- Thin, cold lead and connection joint

Material	Two single conductor Tefzel-coated resistance wires covered by a tin-plated copper braid and then coated with a durable copolymer (PVC) outer jacket. Heating cable is attached to a self-adhesive fiberglass mesh material.
Operating Voltage	120 V
Power Output	12 watts per square foot
Maximum Continuous Exposure Temperature	194°F (90°C)
Heating Cable	2-wire, grounded, twisted air with PVC outer jacket
Cold Lead	2-wire, 18 AWG plus ground braid layer; 10 ft (3 m) length

BENEFITS:

On-site flexibility. Mesh is adjusted on-site to provide heat coverage where it is desired. Installers only need to know the approximate square footage of the area(s) that need to be heated.

Easy to layout. Mesh comes in a self-adhesive roll which is pressed onto the subfloor and adjusted on-site to provide heat coverage where it is desired.

Comprehensive selection of sizes to choose from. Mesh is available in 13 sizes in 120 V which allows installers to choose the perfect sized kit for the area they wish to heat.

Available immediately. Find a local distributor near you at <http://www.nuheat.com/where-to-buy>

Mesh

THE SELF-ADHESIVE ELECTRIC FLOOR HEATING SOLUTION

HOW TO INSTALL:

Step 1: Roll Mesh onto the subfloor with the wire side down. Start the Mesh installation from one corner of the room.

Step 2: Lay out and secure Mesh onto subfloor. To make a turn, cut the Mesh as required (be careful not to cut/damage the heating wire). Separate heating wire from Mesh to maintain heating coverage in small, angled, or difficult areas (if necessary).

Step 3: Embed Mesh in mortar (self-leveling compound or latex-modified thinset).

* Square foot coverage based on square room with 2 in unheated border.

Accessories

	PART NUMBER	DESCRIPTION
Install Pro Alarm 	AC0200	nVent NUHEAT Install Pro Alarm (AC0200) is an electrical fault indicator that simultaneously monitors the hot, neutral and ground wires during installation of any line voltage floor heating system. If a wire is damaged during installation, the Install Pro Alarm will sound an alert, prompting the installer to stop and correct the problem before continuing.
Thermostat Probe	AC0008 – 15 ft lead wire	The Thermostat Probe is installed under the flooring surface and connects to nVent NUHEAT thermostats. It is included with all nVent NUHEAT thermostats and provides a temperature reading of the floor.
Repair Kits – Mat & Cable	AC0014 – Mat Repair Kit: AC0016 – Lead Wire Repair Kit for Mats 120 V AC0017 – Lead Wire Repair Kit for Mats 240 V AC0040 – Cable Repair Kit	The Mat Repair Kit and Cable Repair Kit contain all the materials needed to fix Mats or Cable if they have been damaged during installation.
Mechanical Relay	AC0006 – Relay 120 V input & load relay 25 Amps AC0007 – Relay 240 V input & load relay 25 Amps	Relays are used to control multiple circuits with a single thermostat. They are typically used in large installations where the total amperage of the system exceeds the 15A limit of nVent NUHEAT thermostats.
Extra Cable Guides for Cable System – 12pc	AC0038	Extra cable guides for the nVent NUHEAT Cable floor heating system.
Waterproofing Seam Tape	AC0107 – 6 in x 16 ft AC0108 – 6 in x 98 ft	Waterproof seam tape for nVent NUHEAT Membrane installations where waterproofing is necessary.

Thermostats

SIGNATURE THERMOSTAT

The WiFi-enabled nVent NUHEAT Signature thermostat is the most connected floor heating control available today.

FAST FACTS

- WiFi-enabled
- Works with Amazon Alexa®, the Google Assistant®, IFTTT®, and more! Full list here: nuheat.com/connected-home
- iOS® and Android® apps
- Open API for custom integrations
- Local weather forecast
- Plus all features of the nVent NUHEAT Home thermostat
- 3-year limited warranty

HOME THERMOSTAT

Easy and intuitive programmable thermostat with a high resolution touchscreen interface.

FAST FACTS

- 7 day programmable floor heating thermostat
- Built in on/off switch
- 3.5 in color touchscreen
- Energy use monitor
- Floor sensing and ambient air sensing
- 3-Year Warranty
- Dual-voltage (120 V & 240 V)

ELEMENT THERMOSTAT

Basic electronic thermostat – simplified functionality for ease of use.

FAST FACTS

- Non-programmable floor heating thermostat
- Offers basic control and features for energy usage info and physical on/off switch
- Energy efficient
- Floor sensing and ambient air sensing
- 3-Year Warranty
- Dual-voltage (120 V & 240 V)

nVent NUHEAT Certified PRO

If you are a licensed electrician or tile installer, you can become a nVent NUHEAT Certified PRO. As a Certified PRO installer, you will receive in-depth training that includes:

- An overall understanding of floor heating applications
- How to install all nVent NUHEAT Products
- Floor heating installation best practices, tips and tricks

Be the first to discover new products, innovations and have the opportunity to further deepen your professional expertise and add to your credentials.

The Certified PRO Program will recognize you as a dedicated installer who is trained to the highest industry standards in electric floor heating. Your certification is a reassurance to homeowners that they are hiring a true craftsman who has received best-in-class training for nVent NUHEAT Products.

BENEFITS OF MEMBERSHIP

- Become accredited
- Obtain exclusive rights to offer the nVent NUHEAT 25-Year Total Care Warranty* on your floor heating installations
- Get listed on the Certified PRO installer search tool on nVent.com/NUHEAT
- Take advantage of exclusive promotions and discounts
- Attend exclusive events

Interested? Visit our website <http://www.nuheat.com/certified-pro> to learn more.

Warranty

We believe in the superior quality of our products. That's why we offer a nVent NUHEAT 25-Year Product Warranty on all nVent NUHEAT Floor Heating Systems. We also offer a 25-Year Total Care Warranty for installations completed by Certified PRO installers.

25-Year Product Warranty

- 25-Year Warranty for the value of replacing any nVent NUHEAT floor heating product including Standard Mats, Custom Mats, Cable, Membrane, and Mesh

3-Year Warranty for the value of replacing nVent NUHEAT Thermostats, including Signature, Home, and Element. In order to qualify for this warranty, you must keep a copy of the tests report, relevant invoice, installation photographs and sketches. You must also complete an online warranty registration form within 30 days of installation.

25-Year Total Care Warranty*

- STANDARD PRODUCT WARRANTY PLUS:
 - i. Cost of floor heating repair and installation
 - ii. Cost of floor covering material
 - iii. Cost of installation of floor covering

*Total Care Warranty is an upgrade of our Product Warranty and is offered exclusively and at no additional cost for all installations completed by nVent NUHEAT Certified PRO installers. Learn more about how to become a nVent NUHEAT Certified PRO Installer at nVent.com/NUHEAT
