COMFORT YOU DESERVE

# T2RED & T2REFLECTA

## The Intelligent Underfloor Heating System

The T2Red self-regulating nVent RAYCHEM system senses other heat sources and it automatically adjusts its heat output accordingly. More heat is produced in colder areas – such as near windows or doors – and less heat is produced in warmer areas – such as under rugs and furniture. T2Red is **a self-regulating underfloor heating cable for reduced height installation**. The cable can be installed under **any type of floor surfaces**. The intelligent heating cable is ideal for improved living comfort in the entire house, from bathroom to kitchen. This system combined with T2Reflecta, the pre-grooved, thermally insulated, aluminium-covered plate, provides extra energy savings of 20% or more. The thermal insulation and aluminium plates reduce heat losses and provide an even heat distribution.

### EASY-TO-DESIGN

- One heating cable for all shapes of rooms.

### FLEXIBLE

- Cut-to-length, no cold lead needed.

### IDEAL FOR RENOVATION

- Reduced height.
