

The thin T2QuickNet mat is the ideal solution for renovation for tile floors. The ultra-thin (3mm) mat is laid directly in the filler or tile adhesive. It can be installed on all subfloors which are sufficiently insulated. T2QuickNet exists in two versions: T2QuickNet 90 is ideal for timber subfloors and T2QuickNet 160 when more output and a faster heat up time is required, for example concrete subfloors.

- Only 3mm thick!
- One cold lead (dual wire system).
- Ideal as direct underfloor heating for embedding in tile adhesive or filler underneath the top floor.
